- ▶ Seeing is Truly believing:
 - Speed up the learning process.
 - Students see their improvement immediately
 - Track and document your athlete's progress over time.

"Dartfish is doing incredible things that are good for Baseball."

Roland Hemond

Longtime Major League Baseball Executive & Professional

"Dartfish provides an objective teaching and learning platform. I have not seen a more complete and simple to use tool. I consider it as a vital part of teaching and communicating the game!"

Greg Riddoch

Former Major League Manager & Baseball Professional

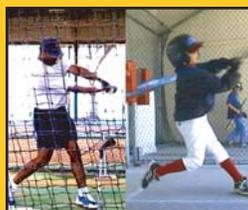

"Dartfish could mean the difference between being in a slump for two weeks or cutting it down to two days. You truly couldn't ask for more...it's worth it's weight in gold."

Gerald Perry

Major League Hitting Instructor & Former Player

VISUALIZE AND COMMUNICATE

Finally, Baseball instruction is more than just feeding balls and explaining the ideal swing. Automatic and instant visual feedback right on the field starts an effective dialogue between student and pro. "In-The-Action" captures & communicates full movement. Video capture can be triggered from a distance with the use of a remote control so you can maintain your instructional style & lesson flow.

ANALYZE

Dartfish delivers the ability to see an athlete through controlled and precise video. Add visual insights and support of your observation skills through written "on-screen" text. Our enhanced tools allow you to break down and analyze each key element of a swing or field movement with precision. It is now easy to compare swing, delivery, mechanics and arm-slot. Draw vertical lines, circles, measure angles, magnify key points and more. Dartfish Video Tools will assist in making you and your athletes better...quicker. Now you can identify the cause of player flaws, not just the symptoms!

SHARE

Increase your economic efficiency through our built-in video sharing system. Dartfish video processing tools can virtually eliminate the need to travel to view prospects or recruits. Extend your coaching expertise through innovation. Versatility - DartTrainer Pro Suite Software is perfectly suited for Outdoor or Indoor Training. We also deliver affordable live-editing or "video index/tagging" allowing you to capture game action.

- ▶ Create multimedia content, with audio comments, that is easily shared by e-mail, CD-ROM or over the internet.
- ▶ One click e-mail format compression and delivery.
- ▶ Create your own videotapes, CD-ROM's or DVD's for saving and sharing both practice and match footage.
