

How to Organise MiniRoos fields

MiniRoos fields are easy to set-up and only take a few minutes. The following equipment is required to set-up MiniRoos fields:

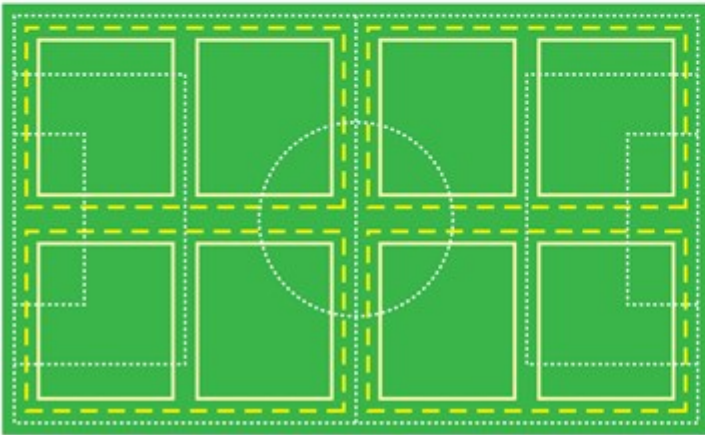

1. Markers or cones to mark out your fields; and
2. Portable goals ([Click here](#) to view the appropriate size for your age group). Poles or markers can be used as goals as alternatives to portable goals.

The below table outlines how MiniRoos fields should look when set-up on a full-size football field.

Field layouts

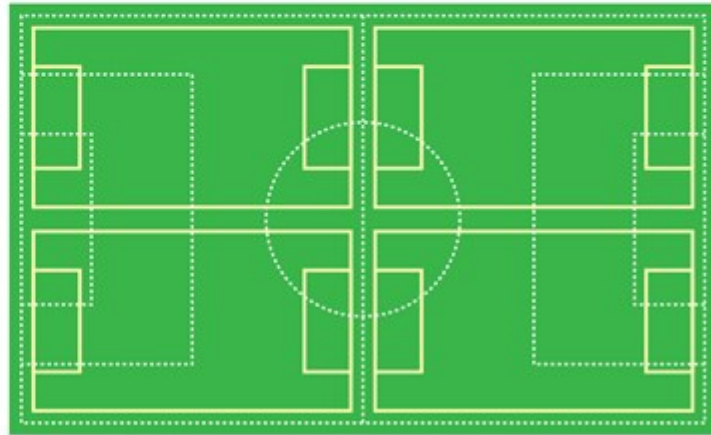

Under 6 & 7

Six to eight MiniRoos Football pitches per full-size pitch if required. MiniRoos Football pitches to the correct dimensions are also set up on existing smaller fields or open grass areas.

Under 8 and 9

Two to four MiniRoos Football pitches per full-size pitch if required. MiniRoos Football pitches to the correct dimensions are also set up on existing smaller fields or open grass areas.

Under 10 and 11

One to two MiniRoos Football pitches per full-size pitch if required. In the Under 11 age group, the final stage of development in the MiniRoos Football formats before players commence 11 v 11 football, it is recommended that clubs where facilities and scheduling allows, set-up the field from penalty box to penalty box and adjust the width of the field with use of markers to meet the maximum specified width. MiniRoos Football pitches to the correct dimensions can also be set up on existing smaller fields or open grass areas.
